	Music Technology	Physics	RMPS	Music		
	Physics		YAA	PE		
				Physics		

In S5 all pupils should have **no less** than five subjects from the above columns. S6 pupils should choose **four** subjects **unless** you are taking three Advanced Highers. Below are the courses that are offered in partnership with NESCol. These are delivered in Columns **A + B**. Foundation apprenticeships can be delivered over one year (for S6 pupils) or two (for S5). These courses contain an element of work experience which you will need to factor in to your timetable. Participation in these courses is subject to application and interview. Your PTPS will support you with this process.

NESCol School Link Courses

Column 1	Column 2
